

Why We're Here Today

This is not about filling a vacancy — it's about reducing hiring risk.

- Senior hires carry disproportionate business risk
- Most hiring failures are invisible until it's too late
- Today is about clarity, evidence, and outcomes

What This Conversation Will Cover

- The real risks behind hiring decisions
- Why traditional recruitment fails critical roles
- How evidence-led hiring reduces mis-hire risk
- What a retained partnership actually delivers

The Real Cost of Getting This Hire Wrong

- Productivity loss rarely shows on a balance sheet
- Cultural mis-fit drives early attrition
- Reputational risk sits with the decision-maker

Severance

Disruption

Replacement

VISIBLE COSTS

VISIBLE COSTS

HIDDEN COSTS

- Productivity Loss
- Cultural Mis-fit
- Reputational Risk

What Success Actually Looks Like

- Faster time-to-impact, not just time-to-hire
- Long-term retention, not short-term relief
- Confidence in the decision, not hope

Why the Contingency Model Breaks Down

- Incentivised for speed, not certainty
- Multiple recruiters duplicate the same effort
- Assessment depth is sacrificed under time pressure

Contingency vs Retained Recruitment

— A Commercial Reality Check

Contingency Recruitment

- Multiple recruiters competing on a no-win, no-fee basis
- Incentivised for speed over certainty
- High duplication of effort across the same job boards and CV databases
- Limited screening and assessment depth; CV-led shortlisting
- Client retains most of the hiring risk and decision burden
- Lower upfront fees, but higher first-year failure rates (>25%)
- Hidden costs emerge through re-hires, lost productivity, and disruption

Retained Recruitment

- Requirement Capture generates a clearly defined brief and outcomes
- Recruiting for quality, fit, and long-term success (Benchmarking process)
- Structured, evidence-led search and targeting of top 5% of talent
- Behavioural, cultural, and competency-based assessment built in
- Higher upfront investment, but significantly lower failure rates (<10%)
- Stronger retention, faster time-to-productivity, and higher ROI.
- Long term free replacement policy

When the cost of a failed hire exceeds the fee, the lowest-risk option is rarely the cheapest.

Hiring Is a Risk Decision — Not a Recruitment Task

- Every senior hire is a commercial risk
- Risk must be identified, measured, and mitigated
- Evidence reduces reliance on gut feel

From Opinion-Led to Evidence-Led Hiring

- Behavioural data over assumptions
- Structured assessment over intuition
- Comparable, explainable decisions

SUBJECTIVE

OBJECTIVE

The Retained Hiring Framework

- Defined outcomes and milestones
- Evidence gathered before shortlisting
- Transparency at every stage

End-to-End Recruitment Workflow

1 Requirement Capture

Align on job specifications & requirements

2 From Job Spec to Client Branded Job Advert

Generate custom job ads for targeted outreach

3 Campaign Brochure

Design branded materials showcasing the opportunity

4 Client Benchmarking Process

5 Top Talent Sourcing Process

AI-driven search for relevant candidates

6 Candidate Questionnaire & Behavioural Assessment

AI-depth role-fit and behaviour analysis

7 Competency Based Video Interview

Assess skills and competencies via recorded video call

8 Shortlist with Insights

Present data-backed shortlist to the client

From Top 5% of Talent — To Shortlist

- **Marketing & Outreach**

Targeted engagement of hundreds of potential candidates matched to skills and experience.

- **Initial Assessment**

Identify 40-50 high-potential candidates that match essential requirements.

- **Behavioural Questionnaire**

20-30 candidates complete intelligent behavioural assessment.

- **AI Video Interview**

5-10 candidates complete competency-based AI interviews.

- **Shortlist & Insights**

3-4 top candidates recommended for interviews and background checks.

Clear Accountability on Both Sides

Defining “What Good Looks Like” — Objectively

- Aligns stakeholders before hiring begins
- Removes internal bias and conflict
- Creates a measurable benchmark
- Easy to identify positive correlations and areas of potential conflict
- Objective behavioural assessments, that translate into the right competency based questions to ask

AI-Powered Video Interviews

Question 1 of 12

● Recording

AI-Generated Questions

System creates behavioral and competency questions based on benchmark correlations and conflict areas.

Avatar Delivery

Professional AI avatars deliver questions naturally, creating a consistent interview experience.

Automated Analysis

AI assesses responses, extracts insights, and generates detailed reports for recruiters and clients.

An Evidence-Backed Shortlist — Not a CV Stack

- Fewer candidates, higher confidence
- Clear rationale for every recommendation
- Interview time focused where it matters

Candidate Name

- ✓ Evidence-backed insight
- ✓ Proven track record in area X
- ✓ Cultural alignment demonstrated

Candidate Name

- ✓ Evidence-backed insight
- ✓ Proven track record in area X
- ✓ Cultural alignment demonstrated

Candidate Name

- ✓ Evidence-backed insight
- ✓ Proven track record in area X
- ✓ Cultural alignment demonstrated

This Is an Investment in Certainty

- Fees aligned to outcomes, not activity
- Risk reduced before the hire is made
- Cost of failure far exceeds the retainer

- Institutional research states that the average cost of a bad hire is between 3–4 times annual salary

How the Investment Is Structured

A commercial model aligned to **progress, evidence, and shared accountability** — not activity.

- **Phased commitment**

Investment is staged to match delivery, Insight, and decision points

- **Transparency at every milestone**

Each phase concludes with defined outputs, review gates, and visible evidence

- **Shared accountability**

The Decision in Front of You

Hope the hire works

Or invest in knowing it will
